Church Energy Purchasing Group
Energy Brokers and Consultants

Dear Church Treasurer or Administrator ,

No doubt you will be aware of the huge and sustained rise in gas & electricity prices. These increases in energy spending have a direct impact on your church's overheads. To help compensate for these increases the CEPG offers all churches a unique opportunity to take advantage of this church energy group purchasing scheme.

How the CEPG works:

- The Church Energy Purchasing Group (CEPG) is an independent energy broker & consultant, free of supplier influence, specialising in specific sub-sector markets such as churches.
- CEPG negotiates discounts and favourable terms on behalf of large numbers of churches.
- Group purchasing serves to 'Aggregate' the purchasing volume of smaller and 'disadvantaged' churches. These increased volumes are leveraged to achieve greater economies of scale resulting in discounts which are passed on to each church.
- Safe. There is no third party invoicing. Each church has their own contract direct with the energy provider and are totally independent of other churches in the purchasing group.
- All electricity and gas quotations are FREE and are supplied without any obligation.
- CEPG does not charge you any fees or commissions. Our fees are met by the energy provider.
- What can you lose? If we can't improve on your current or renewed offer we don't expect you to change.
